

WOUND TREATMENT APPARATUSAbstract of the Disclosure

5 A wound treatment apparatus for treatment of surface wounds with a bandage system configured to control the environment adjacent the wound. The apparatus includes a bandage configured to cover a wound and provide a seal about the perimeter of the wound and cavity over the wound. A fluid supply conduit and a fluid drainage conduit are each in communication with the cavity. A nebulizer is
10 coupled to the supply conduit to supply medicinal fluid to the wound. A waste receptacle is coupled to the drainage conduit to remove the fluid away from the wound.
